"IoT Workshop" for Students in Grades 10-12

The Department of Electrical and Electronics Engineering hosted an Internet of Things workshop for students in Grades 10 to 12, on January 7, 2023, to learn about the wonders and potential of IoT. All participants received a free session. The event began with an introduction to the components, which was followed by hands-on practice building an IoT-based home automation system. The participants were very appreciative of the practical applications and teaching methodologies.
